

KANIMOZHI NAGARAJAN

FULL-STACK DEVELOPER | MERN STACK

kanimozhin166@gmail.com | www.linkedin.com/in/kanimozhi-nagarajan-1a05882ba

SUMMARY

Full Stack Developer with 2+ years of experience designing and delivering scalable MERN stack applications. Proficient in building RESTful APIs, implementing microservices-based architectures, and optimizing MySQL and MongoDB databases for high-performance systems. Achieved improvement in backend performance through query optimization and indexing strategies. Strong experience in secure authentication, API documentation, testing, and Agile-based development workflows.

TECHNICAL SKILLS

- **Frontend:** React.js, Redux, HTML5, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js
- **Databases:** MySQL, MongoDB, MS SQL
- **Languages:** TypeScript, JavaScript, Java
- **Authentication & Security:** JWT, Google Sign-In, RBAC
- **Testing:** Jest, SuperTest
- **API & Documentation:** Swagger, Postman
- **Tools:** GitHub, VS Code, JIRA, Jupyter Notebook, Eclipse

PROFESSIONAL EXPERIENCE

Associate Programmer, Catalystry Consulting Pvt. Ltd.

Oct 2023 - Oct 2025

Cloud Kitchen – POS & Billing Management System (PWA)

Delivered a scalable POS system enabling efficient order processing and secure multi-user access across restaurant operations.

Tech Stack: TypeScript, React.js, Redux, Node.js, Express.js, MySQL, MongoDB, JWT

- Developed a Progressive Web App (PWA) for restaurant POS and billing with real-time order management.
- Built RESTful APIs integrating MySQL (orders & billing) and MongoDB (user services).
- Implemented JWT authentication and role-based access control for secure access.
- Optimized SQL queries and indexing, improving backend response time.

Fintech – Risk Detection & Analytics Platform

Enabled efficient analysis of transaction data to support risk monitoring and data-driven decision making.

Tech Stack: JavaScript, React.js, Node.js, Express.js, MySQL, MongoDB, Python (Pandas)

- Developed a fintech platform supporting fraud detection and risk analytics workflows.
- Built RESTful APIs and dashboards to visualize transaction patterns and risk metrics.
- Improved database performance through query optimization and indexing.
- Performed data transformation using Python (Pandas) for reporting and analysis.

PAST EXPERIENCE

Technology Upskilling Phase

Sept 2022 - Sept 2023

Learned SQL, Python (Pandas, PySpark), and database fundamentals through hands-on practice and supported early learners with SQL and basic OOP concepts.

Educator

June 2018 - Sept 2022

Delivered structured lessons, mentored students, and managed classroom evaluations, strengthening communication, stakeholder coordination, and structured problem-solving skills.

EDUCATION

UG : B.E -Electronics and Communication Engineering

Aug 2009 - April 2013

Meenakshi Sundararajan Engineering College - Chennai
